

Accu-Fit Tube Alignment Clamps

(3/8" to 4½")

With Stand for bench work

Without Stand for field work

Accu-Fit helps welders complete flawless welds on tube and small diameter stainless steel pipe by ensuring precise alignment. Simply open the jaws with the parallel hand cranks, insert the tubes or pipes with any desired weld gap and then close the jaws - the Accu-Fit automatically concentrically aligns any two pipes within its range.

This unit is ready for clean room work straight out of the box. Teamed with one of our powerful End Prep machines, the Accu-Fit completes a perfect cut and clamp combination.

Specifically engineered to accept a wide variety of Orbital Welders, the Accu-Fit is a perfect addition to any tube or pipe workshop. Perfect for clean room applications and for use with orbital welders. Available as a hand-held model or with a matching stand.

Part #	Item and Description	Pipe Size Range	Shipping Weights
