

Micro-Arc Welding Workstation

Ideal For Tool, Die, & Mold Repair

- Stereo Microscope with 10X and 20X magnification and scope cover
- Rack and Pinion Adjustable Tower—includes two 150-Watt Halogen Lights and a custom mounting bracket to suspend the microscope above the part while connected to the tower.
- 7" x 7" ceramic heat control plate
- Copper work surface with weld grounding and insulation from the worktable
- Micro-Die Grinder for part drilling and preparation
- Darkening Lens with adjustable shading that is controlled by a remote foot pedal. Includes an automatic shutoff feature.
- Custom Pyrex Lens for TIG Torch to increase gas shielding while still providing excellent visibility.
- Worktable with Formica Top, Adjustable Legs, Tool Holders, Air/Torch Holders, and Air Hookup
- Printed Reference Material that provides an introduction to tool, die, and mold repair with information on preheat temperatures, filler metal selection, and much more.
